

# Index

---

## A

Acceptable Solution 8, 85  
active control 20  
active systems 143  
addressable analogue detectors 101  
alterations 19, 183  
alternative solutions 12, 183, 196  
Approved Documents 8, 183  
apron projections 76  
ASET 35  
aspirating smoke detector 98, 100  
atrium 132  
automatic fire alarms 146  
automatic fire sprinkler systems 103  
axial restraint 54

## B

BRANZFIRE 69  
Building Act 8, 169, 189  
Building Code 8, 71, 83, 181  
Building Code of Australia (BCA) 8, 83, 195, 196  
building certifier 182, 186  
building consents 182  
building surveyor 13, 18, 198  
building warrant of fitness 10  
burning rate 26  
burning stage 25

## C

calorific value 29, 30  
certificate of occupancy 198  
CFAST 68  
change of use 183, 184  
charring 60  
charring rate 58, 59  
cladding materials 76  
combustion 21  
compartmentation 17  
COMP2 38, 68  
compliance certificates 198  
compliance schedules 10, 184  
composite steel-concrete 51  
computer models 35, 65, 90  
concealed spaces 71, 72, 74  
concrete beam temperature 55  
concrete encasement 49

concrete properties 56  
configuration factor 79  
construction site fire 19  
construction certificates 198  
convection 47  
cool lower layer 66  
cooling power of water 159  
curtain 177

## D

deaths 173  
decay stage 26-27  
deemed-to-satisfy 9, 196, 199  
deluge systems 108  
density 51, 58  
design documentation 11-12  
design fire 29, 65, 70  
design submittal 11  
detection systems 35, 95-103  
detector response 96  
deterministic models 66  
disabilities 91  
domestic fire safety 173-180  
door 16, 74, 83, 87, 136, 139, 178, 179  
dry pipe sprinkler 108  
drywall construction 61

## E

Early Fire Hazard Test 71  
earthquake and fire 19, 161, 184  
effective thickness 49  
electrical fires 20  
emergency lighting 17, 152  
emergency power supply 148-149  
energy balance 26  
equivalent fire resistance 158  
equivalent fire severity 40, 41, 45  
escape 83-94  
escape planning 179  
escape routes 17, 83-84, 85, 178  
Eurocode 40  
EVACNET 90  
evacuation schemes 189  
evacuation systems 185  
evacuation time 83  
existing building 183

exit width 86  
 EXODUS 90  
 exterior windows 74, 76  
 external walls 16  
 extinguishment 18

## F

failure criteria 44  
 false alarms 102  
 FAST 68  
 fast response sprinkler 36  
 FASTLite 67  
 field models 66  
 Fire Brigades Act 196  
 Fire Engineering Guidelines 200  
 fire growth rate 33  
 fire alarm 95, 146  
 fire brigade 155  
 fire compartments 37  
 fire detection 152  
 fire engineering analysis 15, 18-19  
 fire extinguishers 112, 175  
 fire fighters 44  
 fire fighting 163  
 fire growth stage 23  
 fire hose reels 19, 113, 164, 167, 176  
 fire hydrant 158, 163, 167  
 fire loads 37  
 fire model 46  
 fire modelling with computers 65-70  
 fire resistance 17, 43, 46, 78, 178  
 fire resistance level 44  
 fire resistance rating 44, 158  
 fire separations 72  
 Fire Service 10, 17, 19, 152, 155, 167, 181  
 Fire Service access 168  
 Fire Service Act 168, 170, 185, 189  
 Fire Service operations 155  
 fire severity 38, 40  
 fire simulator 35  
 fire spread 71-81  
 fire spread to other buildings 78-81  
 fire spread to other storeys 74-78  
 fire stopping 75  
 fire system centres 156-157  
 FIRECAM 70  
 firecells 37, 71  
 FIRESYS 69, 79, 91  
 FIREWIND 68, 79  
 flame detectors 101, 143  
 flame sizes 76  
 flaming combustion 22-23

flashover 20, 24  
 flexural continuity 54  
 floor ceiling systems 62, 74  
 flow tests 163  
 FPEtool 32, 67, 90  
 frangible bulbs 105  
 fuel load 10, 15, 27, 41  
 fully developed fire 25  
 furniture 30, 31, 34, 176  
 fusible link 105

## G

gas detectors 101  
 generic fire resistance 46, 48  
 glazing 16, 78-79  
 glue laminated timber 58, 60  
 glulam 58, 60  
 growth stage 23  
 gypsum 61, 177

## H

halon 112  
 HAZARD1 68  
 hazardous substances 18  
 heat detectors 36, 143  
 heat release rate 32, 42  
 heat transfer model 47  
 heavy timber construction 58, 60  
 hose reels 16  
 hot upper layer 66  
 human behaviour 20  
 HVAC 120, 143, 147  
 hydrant mains systems 112

## I

ignition 20, 173  
 incipient stage 22  
 insulation 44  
 insurance 10  
 integrity 44  
 interfaces 151  
 intumescent paint 49  
 ion chamber detector 98, 99

## K

kitchen fire 173

## L

life safety 29, 36, 83, 181  
 life-threatening conditions 88  
 lightweight timber 61  
 limiting steel temperature 50

lining materials 41, 177  
 liquid fuels 29  
 load combination 48

## M

maintenance 188, 199  
 manual call point 146  
 manual fire alarms 143  
 masonry 53  
 modulus of elasticity 50  
 moisture content 29, 51,  
 movement of people 19  
 MP9 document 48, 58  
 multi storey buildings 45, 91

## N

narcotic gases 90  
 New Zealand Building Code 8, 71, 83, 181  
 New Zealand Fire Service Act 192

## O

occupant load 84, 87  
 owners requirements 9, 184

## P

passive control 20  
 peer review 12-13, 187  
 performance requirements 15, 18, 196  
 performance-based design 7-8  
 photoelectric smoke detectors 98, 99  
 pilot ignition 22  
 plasterboard 40, 61  
 plastics 31, 43, 177  
 pool fires 29  
 positive pressurisation 137  
 post flashover fire 26, 37, 65  
 pre-flashover fires 29, 36  
 pressurisation of exitways 133, 140  
 pressurisation of stairwells 140-141  
 preventing ignition 16  
 probabilistic models 66  
 probability 18  
 property protection 8, 19, 181  
 proprietary approvals 46, 48  
 pyrolysis 24, 25

## Q

queuing time 83

## R

radiation 47, 77, 78, 79, 80

reinforced concrete 40, 53  
 reinforcing steel 53, 54  
 reliability 145, 153, 161  
 riser mains 17  
 risk assessment 70  
 roof collapse 42  
 room fires 35

## S

safe paths 44, 158  
 safety margin 84  
 safety systems 151  
 SAFIR 47  
 scenario analysis 15  
 security 152  
 seismic gaps 20  
 separation distances 80  
 service ducts 74, 75  
 SIMULEX 91  
 single storey buildings 42  
 SMARTFIRE 66  
 smoke 11, 16, 19, 97  
 smoke detectors 35, 36, 98, 143, 174, 178  
 smoke formation 116  
 smoke migration 119-120  
 smoke reservoirs 129, 132  
 smoke screens 129  
 smoke-stop doors 16  
 smouldering combustion 22, 96  
 solid fuels 30  
 spandrels 76  
 specific fire engineering design 9  
 specific heat 51  
 spontaneous ignition 22  
 spread of fire 43  
 sprinklers 11, 16, 24, 35, 36, 69, 73, 107, 111, 162,  
 166, 175, 199  
 sprinkler heads 104  
 sprinkler response 106  
 sprinkler spray 49  
 sprinkler systems 103-101  
 stability 44  
 stack effect 134  
 stairways 74, 76, 141, 142  
 standard fire test 45  
 standby power 148  
 State Legislation 197  
 steel protection 48  
 structural collapse 37, 43  
 structural model 47  
 structural steel 40, 48  
 structural timber 58

surface spread of flame 71

## **T**

t-squared fire 32, 33

tenability limits 88

thermal conductivity 51

thermal detectors 98

Thomas's flashover correlation 39

timber 58, 62

time-temperature curves 27

transport time 118

travel time 83, 84, 86

## **U**

unprotected steel 51

upholstered furniture 176

## **V**

vehicular access 155-156

vent flow 69

ventilation 24, 25, 27, 35, 40

ventilation controlled burning rate 38

VESDA 100

visibility 89

## **W**

waking effectiveness of alarms 179

walls 62

warrant of fitness 184, 188

water 27

water conservation 161

water filling of steel members 49

water mist 110

water quality 162

water supply 17, 20, 157, 159, 165, 185

wet pipe sprinkler 108

windows 16, 76

wood 31, 58

## **Y**

yield stress 50

## **Z**

zone models 24, 66
