

Contents

Foreword	vii
Acknowledgements	ix
Chapter Overview	xi
1 Introduction	1
1.1 Objectives and scope	1
1.2 Background	1
1.3 Hazardous waste management in the international context	1
1.4 Hazardous waste management in New Zealand	2
1.4.1 The regulatory framework for hazardous waste management in New Zealand	2
1.4.2 New Zealand hazardous waste management studies	5
1.4.3 Conclusions	7
1.5 Future developments	7
2 The New Zealand Hazardous Waste Definition	9
2.1 Introduction	9
2.2 Background and key principles of defining hazardous waste	9
2.2.1 Purpose	9
2.2.2 Requirements	9
2.2.3 Key principles	10
2.2.4 Verification and testing requirements	12
2.2.5 Roles and responsibilities	13
2.2.6 Hazardous waste classification	13
2.2.7 Requirements of the Basel Convention	13
2.3 Proposed hazardous waste definition	14
2.3.1 Purpose	14
2.3.2 Definitions and terms	14
2.3.3 Hazardous waste designation	15
2.3.4 Listing and de-listing hazardous waste	15
2.3.5 Exempting a waste from the hazardous waste list	16
2.3.6 Designating mixed and contaminated hazardous waste	16
2.3.7 Verification and testing requirements	16
2.4 Proposed hazardous waste classification	17
2.4.1 Purpose	17
2.4.2 Classification codes	17
2.4.3 Minimum threshold quantities	18
2.4.4 Requirements for record keeping	18
3 Hazardous Waste and Risk	19
3.1 Background	19
3.2 Hazard and risk	19
3.3 The concept of risk	19

3.4 Risks presented by hazardous waste	20
3.5 Overview of risk management	20
3.5.1 Context	20
3.5.2 Hazard analysis	22
3.5.3 Risk analysis	22
3.5.4 Risk evaluation	24
3.5.5 Risk control	24
3.5.6 Risk communication	24
3.5.7 Uncertainty	24
3.6 Information sources	24
4 Managing Hazardous Waste	25
4.1 The Waste Management Hierarchy and its application to hazardous waste	25
4.2 The principles of Cleaner Production	25
4.3 Waste audits	26
4.3.1 Overview	26
4.3.2 Phase 1: Pre-assessment	28
4.3.3 Phase 2: Establishment of materials balance	28
4.3.4 Phase 3: Information synthesis and development of waste reduction measures	29
4.3.5 Waste audits - conclusions	29
4.4 General hazardous waste management issues	29
4.5 New Zealand hazardous waste management initiatives	30
4.5.1 The Oil Recovery Programme	30
4.5.2 Local government collection programmes for unwanted agricultural chemicals	30
4.5.3 Organochlorines	32
4.5.4 Household Hazardous Waste (HHW) collection programmes	32
5 Treatment Processes and Technologies	33
5.1 Introduction	33
5.2 Definition of treatment	33
5.3 Waste composition and characteristics	34
5.4 Treatment methods available in New Zealand	34
5.4.1 Physical treatment processes available in New Zealand	35
5.4.2 Fixation/stabilisation processes	37
5.4.3 Chemical treatment processes available in New Zealand	38
5.4.4 Biological processes available in New Zealand	39
5.5 Availability and accessibility of commercial treatment facilities	39
5.6 Treatment options specified by central government agencies	40
5.7 Other treatment facilities and technologies	40
5.7.1 Technologies for organochlorine waste commercially available in Australia	40
5.7.2 Plasma enhanced melting	43
5.8 Evaluating new technologies	44
5.9 Considerations for selecting appropriate treatment facilities	44
5.10 Management of hazardous waste containers	45
5.10.1 Reuse and recycling	45
5.10.2 Disposal	45

5.10.3 Removal of residues	46
5.11 Conclusions	46
6 Thermal Processes	47
6.1 Introduction	47
6.2 Critical combustion control parameters	47
6.3 Incinerator components	48
6.3.1 Waste preparation and feeding	48
6.3.2 Combustion chambers	48
6.4 Environmental impacts	49
6.4.1 Gaseous Emissions	49
6.4.2 Products of Incomplete Combustion (PICs)	49
6.4.3 Other gaseous emissions	50
6.4.4 Solid residues and ash	50
6.4.5 Liquid effluents	50
6.5 Examples of incinerator configuration and performance	50
6.6 Mobile versus fixed installations	51
6.7 Types of hazardous waste incinerated in New Zealand	52
6.8 Low temperature thermal desorption	53
6.9 Emission monitoring	53
6.9.1 Incinerator process monitoring	53
6.9.2 Monitoring of gaseous emissions	53
6.9.3 Trial burns	53
6.10 Use of cement kilns for the destruction of hazardous waste	53
6.11 Conclusions	55
7 Land Treatment, Disposal and Containment of Hazardous Waste	57
7.1 Introduction	57
7.2 Land treatment	58
7.2.1 Overview	58
7.2.2 Processes involved	58
7.2.3 Siting and operating parameters	58
7.2.4 Waste suitable for land treatment	59
7.2.5 Acceptability	59
7.2.6 Bioremediation of soils contaminated by hazardous organic waste	59
7.3 Hazardous waste (in-ground) containment facilities (HWCFs)	59
7.3.1 Overview	59
7.3.2 Design considerations	60
7.3.3 After-care and end use	60
7.3.4 Applicability of HWCFs for hazardous waste arising in New Zealand	62
7.4 Disposal of hazardous waste with MSW in landfills	62
7.4.1 Overview	62
7.4.2 Determining hazardous waste acceptability in MSW landfills	63
7.4.3 MSW landfill site selection, design and operation	63
7.4.4 Effects-based case-specific risk assessment	63
7.5 Conclusions	64

8 Warehousing and Storage of Hazardous Waste	65
8.1 Introduction	65
8.2 General principles of storage	65
8.3 Waste receipt	68
8.4 Records and related procedures	68
8.5 Waste segregation	69
8.6 Waste handling	69
8.6.1 Sorting and repackaging	69
8.6.2 Personal protective equipment	69
8.6.3 Personal hygiene	70
8.7 Unidentified waste	70
8.8 Management practices	70
8.9 Risk management	71
8.10 Community awareness	71
8.11 Audits	72
9 Emergency Preparedness	73
9.1 Introduction	73
9.2 Emergency planning	73
9.2.1 Introduction	73
9.2.2 Leadership and administration	73
9.2.3 The emergency plan	73
9.2.4 Principal features of an emergency plan	74
9.2.5 Emergency plan layout and administration	74
9.2.6 Emergency teams	75
9.2.7 Alarm initiation	75
9.2.8 Emergency lighting and power	75
9.2.9 Emergency equipment	75
9.2.10 Emergency communications	76
9.2.11 First-aid training	76
9.2.12 Off-site and transport emergencies	76
9.2.13 Organised outside help and mutual aid plans	76
9.2.14 Protection of vital records	76
9.2.15 Communicating with the public and media	76
9.2.16 Termination of an emergency	77
9.2.17 Post emergency investigations	77
9.3 Emergency services	77
9.3.1 Government agencies	77
9.3.2 Industry	77
9.3.3 Information systems	77
10 The Transport of Hazardous Waste	79
10.1 Introduction	79
10.2 Dangerous goods classification and segregation	79
10.3 Requirements for labelling and documentation	79
10.3.1 Labelling and marking	79

10.3.2 Dangerous Goods documentation	79
10.3.3 Hazardous waste manifests	80
10.3.4 Placards	80
10.4 Transport procedures	80
10.4.1 General safety requirements	80
10.4.2 Requirements for loading security	80
10.5 Emergency response	80
10.5.1 General	80
10.5.2 Safety equipment	80
10.6 Responsibilities of shippers and operators	81
10.6.1 Responsibilities of consignor	81
10.6.2 Responsibilities of loader	81
10.6.3 Responsibilities of driver/operator of road vehicle	81
10.6.4 Responsibilities of driver/operator of rail vehicle	81
10.6.5 Responsibilities of employers	81
10.7 Training	81
10.7.1 General	81
10.7.2 Driver training	82
11 Conclusions	83
List of Abbreviations	85
Glossary	87
References	89
Bibliography	93
